

MOBILIÁRIO ESCOLAR | MOBILIER SCOLAIRE

SCHOOL FURNITURE

THE SCHOOL

EN

COMPANY

Since 1978 Industrial Laborum Ibérica is the first Portuguese company to produce and install laboratory furniture, taking advantage of a growing market segment that until now were solely dependent on imports of goods and services of foreign companies.

SCHOOL

The school is a living, evolving and heterogeneous system, either by requiring the combination of different functional areas or by the morphological conditions, as well as the architectural and constructive quality of the building itself. The need to equip schools with new resources in order to provide an appropriate working environment to the practice of a modern education has enabled Industrial Laborum Ibérica, based on its extensive experience in hospitals and laboratories, to develop school projects.

Projects based on principles of durability and sustainability, which include standardized solutions, arise from the implementation of standard projects and serial construction, but also innovative solutions, in terms of space and construction, in buildings with recognized heritage value.

Hence, Industrial Laborum Ibérica meets the requirements of the new educational and environmental paradigms ensuring the conditions for schools' integrated work.

Quality Standards and Certification

Industrial Laborum Ibérica is annually audited and certified by TÜV Rheinland Group, a multinational, leader in providing inspection and certification.

Therefore, ILI's lab furniture accomplish the most demanding regulations, because the whole manufacturing process is certified according ISO 9001:2008.

The investment in recognition of our expertise includes the testing and certification of Fume Cupboards, EN14175-2:2003 (Ed.1) e EN14175-3:2003 (Ed.1) and Chemical Laboratory Benches, EN 13150:2002 (Ed.1).

PT

EMPRESA

Desde 1978 a Industrial Laborum Ibérica é a primeira empresa portuguesa a produzir e instalar mobiliário de laboratório, aproveitando um segmento de mercado em ascensão que, até à data, dependia exclusivamente da importação de bens e serviços de empresas estrangeiras.

ESCOLA

A escola é um organismo vivo, evolutivo e um conjunto heterogéneo quer pela exigência da articulação dos seus diferentes sectores funcionais quer pelas condições tipo-morfológicas e qualidade arquitectónica e construtiva do próprio edifício onde se insere. A necessidade de dotar as escolas de novos meios que proporcionem ambientes de trabalho adequados à prática de um ensino moderno permitiu à Industrial Laborum Ibérica, com base na sua vasta experiência nas áreas hospitalar e laboratorial, o desenvolvimento de projectos para escolas.

Projectos assentes em princípios de durabilidade e sustentabilidade de intervenção, que compreendem soluções normalizadas, decorrentes da aplicação de projectos-tipo e recorrentes à construção em série, mas também soluções inovadoras, em termos espaciais e construtivos, em edifícios com reconhecido valor patrimonial.

A Industrial Laborum Ibérica responde, deste modo, às exigências decorrentes dos novos paradigmas educativos e ambientais, garantindo as condições para o funcionamento integrado das escolas.

Normas e Certificação

A Industrial Laborum Ibérica é anualmente auditada e certificada pela TÜV Rheinland Group, empresa líder na prestação de serviços de inspecção e certificação. Assim, o mobiliário de laboratório da ILI cumpre os regulamentos mais exigentes, já que todo o processo de produção tem a certificação ISO 9001:2008.

A aposta no reconhecimento das nossas competências abrange, ainda, o ensaio e a certificação das Hottes Químicas, EN14175-2:2003 (Ed.1) e EN14175-3:2003 (Ed.1) e das Bancadas Laboratoriais, EN13150:2001 (Ed.1).

FR

ENTREPRISE

Depuis 1978 Industrial Laborum Ibérica est la première entreprise portugaise à produire et installer du mobilier de laboratoire, bénéficiant ainsi d'un segment en ascension dans le marché, qui à date dépendait exclusivement de l'importation des biens et services de compagnies étrangères.

L'ÉCOLE

L'école est un organisme vif et en évolution constante, c'est un ensemble hétérogène dû aux exigences d'articulation de ses différents secteurs fonctionnelles et par les conditions type morphologiques et qualités architecturales et constructives des propres bâtiments ou se développe. La nécessité de fournir les écoles de nouveaux moyens qui proportionnent des environnements de travail adéquats à la pratique de l'enseignement moderne à permit à Industrial laborum Ibérica, basé sur sa vaste expérience dans les domaines hospitaliers et de laboratoire, de développer des projets pour les établissements d'enseignement.

Ces projets sont basés sur des principes de durabilité et d'intervention soutenable, qui englobe des solutions normalisées, basés sur des projets types et sur la construction en série, mais également innovatrices, en ce qui concerne l'espace et la construction, sur des édifices avec valeur patrimoniale.

Industrial Laborum Ibérica répond, de cette façon, aux exigences des nouveaux paradigmes d'enseignement et des conditions environnementales pour assurer le fonctionnement intégré des écoles.

Normes et Spécifications

Industrial laborum Ibérica est annuellement contrôlée et certifié par la TÜV Rheinland Group, société leader dans la prestation de services d'inspection et certification. Ainsi le mobilier de laboratoire de ILI répond aux règlements les plus exigeants, vu que tout le processus de production à une certification ISO 9001:2008.

Le parie sur la reconnaissance de nos compétences s'étend aussi à la recherche et certification des Sorbonnes de chimie, EN 14175-2 :2003 (Ed. 1) et EN 14175-3 :2003 (Ed. 1) et des paillasse de laboratoires, EN 13150 :2011 (Ed. 1).

LAB'S SPATIAL LAYOUT + STANDARD PREP. ROOM

EN

SCHOOL STANDARD CLASSROOMS

The projects which include standardized solutions have generally two standard classrooms: the lab and preparation room.

Through a plan and two views of the same simulated space, it is possible to understand the layout of the fixed and non-fixed equipments throughout the space, as well as the type of equipment of each classroom.

PT

SALAS TIPO DA ESCOLA

The projects which include standardized solutions have generally two standard classrooms: the lab and preparation room.

Through a plan and two views of the same simulated space, it is possible to understand the layout of the fixed and non-fixed equipments throughout the space, as well as the type of equipment of each classroom.

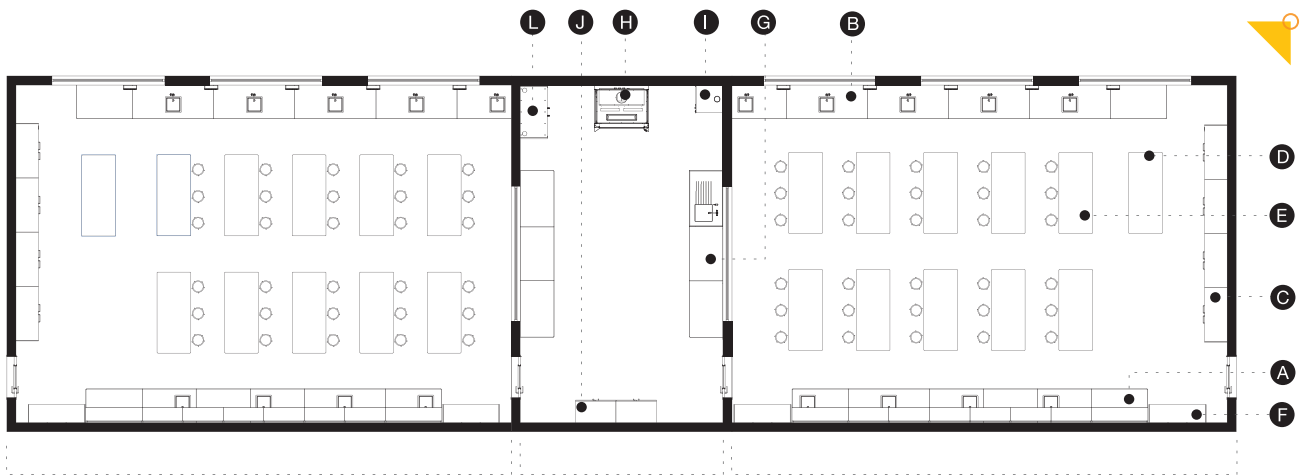

FR

SALLES TYPE DE L'ÉCOLE

Les projets qui englobe des solutions normalisées ont généralement deux types de salles standard: le laboratoire et la salle de préparation.

Grâce à un plan et deux vues d'un même espace simulé, on comprend comment le matériel non-fixe et fixe peut éventuellement s'organiser dans l'espace et l'équipement de chaque salle.
